WORK EXPERIENCE

Web Developer

June 2025 – September 2025

Small Offer / Germany

[LINK](#)

Developed a modern web platform for managing and displaying multi-category classifieds (Cars, Real Estate, Electronics, Services, etc.) using **Next.js, Tailwind CSS, Framer Motion, React Query, Axios, and WebSockets**.

- Implemented a full **authentication system** with account creation and detailed user profiles.
- Built an **ad management system** with image uploads and integrated **geolocation services**.
- Designed and optimized **advanced search and filtering** by category, price, location, status, and date.
- Developed a **real-time chat system** using **WebSockets**, including instant notifications and alerts.
- Developed a **user dashboard** to manage profile information, including profile image, name, phone number, and location.

PROJECTS

Restofy -SaaS Platform for Restaurant Management

[LINK](#)

Developed a complete **SaaS platform** tailored for restaurants using **Next.js, TypeScript, Tailwind CSS, and Framer Motion**. Key features:

- Built a **marketing website** with a demo mode allowing users to explore the platform before subscribing.
- Implemented **multi-restaurant support**, enabling each restaurant to have its own dedicated site connected to the platform.
- Integrated **online payment system** to support subscription plans.
- Developed an advanced **dashboard** for managing staff, adding menu items, controlling website content, and handling restaurant operations.
- Created a **user dashboard** for customers to manage personal data and profile settings.

Portfolio 2025

[LINK](#)

Developed a personal portfolio website using Next.js, implementing advanced page routing techniques for smooth navigation.

- Integrated Framer Motion for dynamic animations and applied Tailwind CSS to design a modern and responsive user interface.
- Enhanced user experience by creating seamless transitions and visually engaging motion effects.

San Francisco City Academy 2024

[LINK](#)

Developed a complete school management platform using React.js, JavaScript, Tailwind CSS, and Framer Motion. Key features:

- Developed a school website leveraging React.js, implementing advanced page routing strategies for optimized navigation.
- Implemented dynamic animations using Framer Motion and applied Tailwind CSS, visually appealing UI.
- Designed a user-centric interface with interactive features and responsive layouts, significantly enhancing overall user experience (UX).
